Amnis

This fast paced and highly interactive programme gives participants the understanding and experience to enable them to successfully participate in Lean programmes within healthcare organisations.

The Accelerated Lean Skills Programme covers all the basic concepts of Lean and how these can be turned into successful Lean events and programmes. The programme is accredited by the Institute for Healthcare Management and involves 3 days of training and a short post-training project for which telephone and email support is available.

Course Description

The Accelerated Lean Skills Programme (ALSP) is a fast paced programme designed to take participants from the basics up to the position where they can successfully participate in Lean events and have the underpinning knowledge of the basic Lean tool set.

The three days of training broadly cover the following topics:

- Day 1 – Lean Basics & Core Lean Tools (Part 1)
- Day 2 – Value Stream Mapping & Core Lean Tools (Part 2)
- Day 3 – Lean Simulation & Making Lean Programmes Work

The course is aimed at those with little or no knowledge of Lean and those looking to take their basic knowledge to a higher level.

The logo for Amnis, featuring the word "Amnis" in a bold, blue, sans-serif font. The letter 'A' is stylized with a blue triangle pointing upwards. A blue swoosh underline is positioned beneath the letters 'm', 'n', and 'i'.

Feedback from Previous Participants

*"The three days flew by and I learnt alot.
An excellent mix of presentation and doing.
The refresher exercises helped to remember
key aspects of the programme. It has definitely
been worth taking three days out to participate."*

Claire Hogg, Divisional Manager (Surgery), UCLH

" Amnis created an atmosphere where we were able to play with Lean, challenge ourselves and think about how we'd apply the technology and development in our team. We want to embed the learning and development in the organisation by adding other events."

Miranda Wicking , AD Strategy & Performance, NHS Hammersmith & Fulham

"The most useful service improvement event I've been on"

Melanie Griffith, Cancer Performance Manager,
Basingstoke & North Hants NHS Foundation Trust

*"Very useful. Does exactly what it says it will deliver. Gives
you the knowledge and the opportunity to apply the principles."*

Simone Akuffo-Akoto, Service Improvement Lead, Tower Hamlets PCT
